Net Fee and Commission Income essentially stable vs 1Q10

Quarterly Analysis

(€ m)

- Decrease in 1Q11 vs 4Q10 mostly due to the absence of AuM performance fees registered in 4Q10 (€24m), the decision not to place third-party bonds in 1Q11 and lower fees from credit facilities granted, particularly from Structured Finance activity

(€ m)

- Net fee and commission income up 1.3% excluding the impact of the decision not to place third-party bonds in 1Q11
- Slight growth (+0.5%; +€3m) in commissions from Management, dealing and consultancy activities due to good performance of portfolio management and insurance products which more than offset the decline in placement of securities, largely due to the decision not to place third-party bonds in 1Q11

Methodological note (1/2)

- For comparison purposes, 2010 P&L and 2010 Balance Sheet have been restated to take into account the effect of the sale of Cassa di Risparmio della Spezia and - with reference to only the Balance Sheet data - of the 11 branches to Crédit Agricole
- With reference to the divisional figures, 2010 data has been restated to take into account
 - the attribution of Intesa Sanpaolo Private Bank Suisse results to the Banca dei Territori division, previously attributed to the Corporate and Investment Banking division and
 - the attribution of the results of 96 branches - disposal of which is underway to Crédit Agricole - to Corporate Centre, previously attributed to the Banca dei Territori division
- The amendment to IAS 39 adopted by the European Union permitted the reclassification of Financial assets held for trading and/or available for sale into other categories. Following a clear change in the Company's intention taken as a result of unusual events, Intesa Sanpaolo reclassified €3,035m Financial assets held for trading into Loans & Receivables, €179m Financial assets held for trading into Financial assets available for sale and €6,106m Financial assets available for sale into Loans & Receivables. This reclassification reflected management intent to hold for the foreseeable future those assets for which the current and expected future market conditions no longer permit active management. Without this reclassification the 1Q11 income statement would have included €51m⁽¹⁾ as positive impact from fair value measurement, while the Shareholders' equity would have included €938m⁽¹⁾ as negative direct impact as at 31.03.11 (of which €208m⁽¹⁾ of positive impact in 1Q11)

■ Fair value sensitivity of the structured credit products book: -€7m⁽⁴⁾ for +25bps of credit spreads

(1) The column "Net exposure", which includes write-downs and write-backs, sets out: for securities, fair value; for derivatives, the nominal value of the contract, net of capital gains and losses recorded at the date of reference. Such amounts correspond, for "long" positions, to the maximum potential loss (in the event of 100% default and recovery rate of 0). For "short" positions, on the other hand, they indicate the maximum potential gain (in the same scenario in terms of default and recovery level). For assets reclassified to Loans, exposure to risk is provided by the carrying amount of the security, equal to fair value at the reclassification date, plus accrued interest calculated at the effective interest rate net of net value adjustments to the portfolio. As for "long" positions, 50% valued through mark-to-model (100% of unfunded positions, 33% of funded positions, 100% of monoline risk and of non-monoline packages), 43% through comparable approach (58% funded positions) and 7% through effective market quotes (9% of funded positions). As for "short" positions, 52% valued through mark-to-model (100% unfunded positions and 100% of positions of funds) and 48% valued through effective market quotes (100% of CMBX-CDS hedges)

(2) Assets reclassified to the Loans portfolio showed, as at 31 March 2011, an overall impact on the income statement equal to zero, broken down as follows: -€3m losses, deriving from the impairment of a security transferred from the portfolio of the Romulus vehicle to the parent's Company credit portfolio; -€2m of net value adjustments from the impairment of two "Irish RMBS Non conforming" of the Parent's Company portfolio; +€5m profits on market disposal of debt securities included in this segment, of which €4m ascribable to the Group company Banca IMI

(3) Including Positions of funds for a net exposure of €58m as at 31.03.11 and of €64m as at 31.12.10

(4) -€19m if part of the Structured credit products had not been reclassified to Loans for a total amount equal to €2,072m of nominal value and to €1,869m of net exposure leading to a total impact on income statement before tax for 1Q11 equal to -€34m
